Profile

Site Planner with extensive experience coordinating fast-paced logistics operations within a leading FMCG manufacturing environment. Experienced in planning workloads, managing changing operational priorities and ensuring the timely movement of products through effective coordination with transport, warehouse and production teams.

Confident using SAP, Microsoft Excel and Microsoft Teams to manage operational data, maintain accurate records and support informed decision-making.

Known for remaining calm under pressure, identifying risks early and adapting plans to meet service requirements while maintaining high standards of accuracy and compliance.

Professional Experience

Arla Foods — Site Planner (November 2025 – Present)

- Coordinate daily despatch operations within a high-volume FMCG manufacturing environment, ensuring products are released accurately and on schedule.
- Plan and prioritise workloads, responding quickly to operational changes while maintaining service levels.
- Use SAP to manage operational information, maintain transport plans and ensure accurate system data.
- Monitor schedules throughout the day, identifying potential risks and implementing solutions to minimise disruption.
- Work closely with Production, Warehouse, Logistics and Transport teams to ensure smooth operational flow.
- Maintain accurate operational documentation and ensure full product traceability.
- Analyse operational performance and identify opportunities to improve efficiency and reduce turnaround times.
- Support continuous improvement initiatives by reviewing processes and recommending operational improvements.
- Lead and support operational teams while maintaining high standards of Health & Safety, food safety and compliance.

Arla Foods — Bay Technician (June 2022 – November 2025)

- Led by example in a fast-paced environment, managed a team of operatives professionally whilst fostering a positive and motivated team culture.
- Planned ahead of schedule to ensure strict time slots were met and ensured goods were despatched accurately and on time, being proactive in preventing any delays.
- Balanced multiple and conflicting workloads, demonstrating the ability to prioritise tasks efficiently and adapt to make robust decisions under pressure.
- Experienced in utilising the SAP system, maintaining records in line with the Transport Plan and ensuring all information was accurate and up to date.
- Continuously promoted service improvement, analysed team performance and revised strategies in order to achieve low Bay Turnover.
- Verified vehicle documentation, trailer numbers, and load accuracy to confirm that all products met required standards and temperatures.
- Ensured all documentation and records were completed precisely to enable traceability and issue resolution.
- Enforced a high standard of Health & Safety awareness across all operations and logged safety observations through the LIA system.

Arla Foods — Despatch Operative (June 2019 – June 2022)

- Completed all cold store operations, including order picking, physical inventory, loading and housekeeping duties.
- Monitored advanced warehouse technology such as Automated Guided Vehicles to achieve daily targets efficiently.
- Maintained strict adherence to Food Hygiene and Health & Safety standards.
- Reported faults promptly, and performed basic maintenance and fault diagnosis to prevent downtime.

Education

Middlesex University — BA (Hons) Film (September 2016 – June 2018)

Completed two years of a Film degree combining practical filmmaking with analytical and written study, developing strong communication and expression.
